

Tillage

The prolonged mild weather has meant that all early sown **Oilseed Rape** crops are progressing exceptionally well. It is important in the most advanced crops to apply **Caramba at 0.8l/ha** which acts as a growth regulator and reduces the onset of **Phoma**. Add **Bortrac at 0.5l/ha** to reduce the threat of **Boron deficiency**.

Winter Wheat and Barley:

It is also time to apply a winter herbicide to all early sown **Winter Wheat** and **Barley**. Use **IPU at 2.5l/ha + DFF at 0.25l/ha**. In **high grass weed situations** use: **Flight at 3l/ha + IPU at 1l/ha** to ensure maximum control. If you intend using **Broadway Star** in the spring it is very important to control annual meadow grass using **IPU** in the coming weeks. It is important not to forget **Sumi-Alpha at 1l/15 acres** for aphid control (very important given the mild weather).

It may also be worth using **Nutriphite (liquid Phosphater)** at 0.5l/ha. Phosphorus in this form is extremely important for vigorous root development and tiller survival over the winter months. At a cost of approximately **€5/acre** it is definitely worth using this autumn.

Annual November Agri Day

Our annual Agri Day will take place on Friday the 15th of November in our Baltinglass Agri Store. The amazing offers on the day will also be available in our 5 other branches, this way all of our customers can avail of this annual giveaway! Activities on the day in Baltinglass will include: Trade Stands, Supplier Demonstrations, Grassmen, RoadHog, free food and refreshments all day. Put it in your diary!

Feed

Minerals: It is very important if home mixing this winter to use the right minerals to compliment your feed. In fact the supply of suitable minerals is as important as the feed itself.

For Example: If feeding **Maize/Beet** you will need a **high phosphorus mineral** as these feeds are deficient in P. Supplying phosphorus is very important as deficiency in P can cause:

- Reduced appetite
- Retarded growth of younger cattle
- Lower milk yields
- Reduced fertility

Quinns stock a wide range of molasses based minerals in buckets and bags including Uniblock, Crystalyx, and the newly launched Acorn Buckets.

BE IN WITH A CHANCE TO WIN

Subscribe to our e-newsletter on our website (www.quinns.ie) and be in with the chance of winning a **Samsung Galaxy Smartphone**.

Winner will be announced in our December newsletter.

Ho! Ho! Ho! Christmas Relight your fire around the corner!
