FEEDING FOR EFFICIENT PRODUCTION

Quinns of Baltinglass Ltd, a family run business since its establishment in 1936 is today one of the leading agricultural merchants in the country. Quinns have been manufacturing coarse rations since 1996 in Baltinglass.

Following the recent completion of an additional state of the art feed pelleting plant Quinns can now offer a comprehensive range of quality nuts alongside coarse rations.

The new feed plant is accredited under the Universal Feed Assurance Scheme (UFAS) and all grain purchased is from Irish Grain Assurance Scheme (IGAS) approved growers.

All home grown grain and proteins are blended with only the best quality imported raw materials available to ensure optimum quality feeds at all times.

Quinns have also invested in a NIR machine which now enables the Quality Control Manager to analyse both incoming raw materials and the outgoing finished feeds on site. This new facility guarantees that customers will get a consistent quality feed at all times.

Maximising performance is what Quinns are all about and to achieve this, the sales and technical team are available to provide both practical and nutritional advice as well as a wide range of on farm services including forage sampling (grass and preserved forages), milk analysis and soil analysis.

Quinns have formulated a superior ewe mineral package which is included in our supreme range of coarse rations and pellets.

- High levels of Vitamin E – 50mg/Kg as fed
- Includes Selplex
- High level of iodine included – 10mg/Kg fed

Benefits:

- Helps reduce retained placentas
- Ensure good muscle tone at lambing and lambs suckle earlier
- Improves colostrum quality to ensure strong lambs with a strong immunity and therefore lamb vigour and survival increases
- Reduces occurrence of mastitis

FEEDING FOR EFFICIENT PRODUCTION

Sheep Pellets

SUPREME INTENSIVE LAMB

- Optimum levels of starch with quality cereals
- Promotes top quality lamb carcass finish
- Suitable levels of digestible fibre for safe creep feeding
- Contains ammonium chloride to help prevent urinary calculi
- Suitable for feeding at grass, in-house or ad-lib.

Crude Protein	ME	UFV	Bulk	Bags
18%	11.2	0.95	✓	✓

SUPREME 20% EWE

- Superb nut including a high level of soya bean meal, maize meal and barley
- Formulated for high performing flocks – the high level of soya bean meal and oats are excellent ingredients to promote strong lamb growth and encourage strong milk yields
- Includes Cal Mag at a rate of 10 grams per 1Kg of feed – this is to help prevent tetany when ewes are let out to grass after lambing
- High specification mineral package.
- Contains **Rumi Sheep**

Crude Protein	ME	UFL	Bulk	Bags
20%	11.2	0.96	✓	✓

SUPREME 18% EWE

- High spec ewe nut with a high level of soya bean meal and native cereals
- Includes cal mag at a rate of 10grams per 1 Kg of feed – this is to help prevent tetany when ewes are at grass
- Contains **Rumi Sheep**

Crude Protein	ME	UFL	Bulk	Bags
18%	11.2	0.95	✓	✓

SUPER 18% EWE

- High energy Ewe Nut with optimum levels of Cereals.
- High quality proteins used including soya bean meal, maize distillers and beans
- Contains Vitamin E to enhance colostrum and lamb thrive.
- High quality protein sources to enhance milk output on both grass and forages.
- Formulated to include a complete mineral and vitamin package
- Includes Cal Mag at a rate of 10 grams per 1Kg – this is to help prevent tetany when ewes are let out to grass after lambing.

Crude Protein	ME	UFL	Bulk	Bags
18%	11.1	0.96	✓	✓

SUPER RAM

- High inclusion of cereals including barley and maize meal
- Quality protein sources included
- Suitable for feeding to store lambs on grass or in house.
- Promotes high intake due to good digestible fibre
- Contains ammonium chloride to help prevent urinary calculi
- Contains a high level of Zinc, Cobalt and vitamin B12 to promote a good thrive.

Crude Protein	ME	UFV	Bulk	Bags
16%	11	0.95	✓	✓

FEEDING FOR EFFICIENT PRODUCTION

Sheep Coarse Rations

SUPREME 20% EWE

- High inclusion of Soya Bean Meal to ensure viable lamb birthweights and quality colostrum along with an ample milk supply
- This ration is formulated for flocks with a high scanning rate as its high in protein and energy
- Includes rolled barley, oats and beet pulp nuts
- Includes Cal Mag at a rate of 10 grams per 1Kg – this is to help prevent tetany when ewes are let out to grass after lambing
- Do not feed to lambs as it contains added magnesium which can cause kidney stones
- Contains **Rumi Sheep**

Crude Protein	ME	UFL	Bulk	Bags
20%	11.1	0.96	✓	✓

SUPREME INTENSIVE LAMB

- High inclusion of toasted barley and flaked maize which promotes good intakes and digestibility
- Protein is pre-dominantly sourced from by-pass protein i.e. soya bean meal
- Includes beet pulp nuts and rolled beans
- Blended with molashine molasses – a very high quality molasses which has added oil included
- Includes a high spec mineral with a high level of Zinc, Cobalt and vitamin B12 added
- Includes Yea-Sacc which is proven to increase daily live weight gain by maximising digestion and therefore performance
- Suitable for feeding ad-lib
- Includes Ammonia Chloride to aid in the prevention of urinary calculi.

Crude Protein	ME	UFV	Bulk	Bags
18%	11.1	0.96	✓	✓

SUPER 21% SHEEP BALANCER

- This is a mix suitable for mixing with farm stored cereals
- The protein is derived from a blend of soya bean meal, rolled beans and wheat distiller's pellets
- Includes a high level of digestible fibre sourced from beet pulp nuts and soya hulls
- When mixed at a ratio of 50:50 it formulates to approximately 15.5% crude protein
- When mixed at the 50:50 ratio it gives the full recommended mineral and vitamin level
- Must be complimented with forage
- High inclusion of molasses to ensure maximum palatability
- Includes Ammonia Chloride to aid in the prevention of urinary calculi.

Crude Protein	ME	UFV	Bulk	Bags
21%	10.8	0.92	✓	✓

SUPER 17% EWE

- Ideal for feeding to ewes and hoggets pre lambing
- High inclusion of rolled barley, whole oats and beet pulp nuts
- Very palatable mix with a high inclusion of molasses
- Must be complimented with forage
- Includes Cal Mag at a rate of 10 grams per 1Kg – this is to help prevent tetany when ewes are let out to grass after lambing
- Do not feed to lambs as it contains added magnesium which can cause kidney stones
- Includes a high spec mineral and vitamin package.

Crude Protein	ME	UFV	Bulk	Bags
17%	11	0.94	✓	✓

FEEDING FOR EFFICIENT PRODUCTION

SUPER 14% HOGGET

- High inclusion of rolled barley and whole oats
- Suitable for feeding to store lambs
- Can be fed at high levels when fodder is short
- Very palatable with a high molasses content
- Includes Rolled beans, wheat distillers and flaked maize
- Includes Ammonia Chloride to aid in the prevention of urinary calculi
- Contains a high level of Zinc, Cobalt and vitamin B12 to promote a good thrive.

Crude Protein	ME	UFV	Bulk	Bags
14%	11	0.94	✓	✓

Note: Proteins and energy levels can vary slightly from the listed with changes in ingredients used
