FEEDING FOR EFFICIENT PRODUCTION

**Quinns of Baltinglass Ltd, a family run business since its establishment in 1936 is today one of the leading agricultural merchants in the country. Quinns have been manufacturing coarse rations since 1996 in Baltinglass.**

Following the recent completion of an additional state of the art feed pelleting plant Quinns can now offer a comprehensive range of quality nuts alongside coarse rations.

The new feed plant is accredited under the Universal Feed Assurance Scheme (UFAS) and all grain purchased is from Irish Grain Assurance Scheme (IGAS) approved growers.

All home grown grain and proteins are blended with only the best quality imported raw materials available to ensure optimum quality feeds at all times.

Quinns have also invested in a NIR machine which now enables the Quality Control Manager to analyse both incoming raw materials and the outgoing finished feeds on site. This new facility guarantees that customers will get a consistent quality feed at all times.

Maximising performance is what Quinns are all about and to achieve this, the sales and technical team are available to provide both practical and nutritional advice as well as a wide range of on farm services including forage sampling (grass and preserved forages), milk analysis and soil analysis.

**FEEDING FOR EFFICIENT PRODUCTION**

**Quinns have formulated and developed two unique superior dairy mineral packages which are included in all of our Supreme dairy feed range. Each package is designed to maximise performance and herd health whether at grass or indoors. We have developed a beef mineral package which is formulated for animals being intensively fed.**

## **Rumi Pro**

- Helps reduce urea levels in milk – An Ammonia grabber is included
- Increased fertility performance – Protected Selenium and Copper included
- Reduction in lameness – Protected Zinc and Biotin included
- Improved herd health – High inclusion of Vitamin E & protected copper

## **Rumi Pro**

- Maximise feed conversion efficiency – Yea-Sacc included
- Stabilise rumen pH – acid buffer included
- Increased fertility performance – Protected Selenium included
- Improved herd health – Protected Zinc and Selenium included

## **Rumi Gain**

- Maximise feed conversion efficiency – Yea-Sacc included
- Reduced risk of lameness – Protected Zinc included
- Improved herd health – High inclusion of Vitamin E, protected copper and Vitamin B
- Reduced risk of acidosis – Acid buff included

# Summer Dairy Pellets & Coarse Rations

## SUPREME SPRING BREEDER

- Formulated for feeding dairy cows in early lactation in the spring
- High energy formulation with a high inclusion of maize meal
- Very high UFL value targets getting cows back in calf quickly
- Soya bean meal, distillers and rolled beans sources of protein
- Digestible fibre in the form of soya hulls included
- Calcined Magnesite: 2oz in 11lbs (56 g in 5 Kg)
- Contains **RumiPro**

## SUPER SUMMER 16% DAIRY

- High inclusion of cereals including maize, barley and wheat
- When grass growth is poor and cows need more protein supplementation
- Specifically suitable to cows in all stages of lactation
- Quality protein sources used including distillers and rolled beans
- Digestible fibre in the form of soya hulls included
- Calcined magnesite: 2oz in 8lbs (56g in 3.6Kg)
- Fully balanced with minerals and vitamins.

## SUPER SUMMER 14% DAIRY

- High energy dairy feed with high inclusion of cereals including maize, barley and wheat
- Moderate levels of protein help balance the lush grass
- High inclusion of digestible fibre to balance fresh grass
- Calcined magnesite: 2oz in 4lbs (56g in 1.8Kg)
- Fully balanced with minerals and vitamins.

## SUPER SUMMER 12% DAIRY

- Cereal based dairy feed to encourage optimal intake
- Includes soya hulls as fibre source to optimise milk solid levels at lush grass
- Calcined Magnesite: 2 oz in 4lbs (56g in 1.8Kg)
- Fully balanced with minerals and vitamins.

## Winter Dairy Pellets & Coarse Rations

### SUPREME WINTER 20% DAIRY

- Top quality dairy nut formulated to achieve a rapid milk yield response following calving while being mindful of not compromising cow body condition
- Use a blend of energy sources with maize being the primary source
- Soya bean meal included at a high level along with maize distillers and beans
- Includes a rumen buffer to counteract any acid build up
- Recommended feeding rate of up to 10kg per head per day
- Includes **RumiPro** 

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
20%	10.9	0.92	✓		✓	

### SUPREME WINTER 18% DAIRY

- Maize based dairy feed
- Formulated to drive milk yield and cow performance
- Carefully balanced with fibre and a blend of energy sources to avoid digestible problems
- Soya bean meal is primary source of protein
- Includes a rumen buffer to counteract any acid build up
- Recommended feeding rate of up to 10kg per head per day
- Includes **RumiPro** 

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
18%	11.2	0.95	✓		✓	

## SUPER WINTER 20% DAIRY

- Formulated to include a high level of energy sources to promote milk yield and composition
- Suitable for dairy cows at all stages of lactation
- Quality protein sources used including soya bean meal, Distillers and rolled beans
- Digestible fibre included in the form of soya hulls
- Recommended feeding rate of 4 – 8 kg per head per day
- Fully balanced with minerals and vitamins.

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
20%	10.9	0.92	✓		✓	

## SUPER WINTER 18% DAIRY

- High in energy to promote milk yield and composition
- Suitable for feeding to dairy cows at all stages of lactation
- Includes soya bean meal, distillers and rolled beans as protein sources
- Digestible fibre in the form of soya hulls included
- Recommended feeding rate is 4 -8kg per head per day
- Fully balanced with minerals and vitamins.

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
18%	11	0.92	✓		✓	✓

## 28% DAIRY BALANCER

- Balanced dairy feed formulated to compliment maize silage or beet in a dairy diet
- Generally advised to use a 28% Dairy Balancer when feeding equal proportions of grass silage and maize silage or beet
- Includes a blend of protein sources including soya bean meal, maize distillers and rolled beans
- Includes soya hulls as the source of digestible fibre
- Recommended feeding rate of up to 8Kg per head per day
- Includes a high phosphorus dairy mineral
- Includes  RumiPro.

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
28%	10.9	0.91	✓		✓	

## 24% DAIRY BALANCER

- Balanced dairy feed formulated to compliment maize silage or beet in a dairy diet
- Generally advised to use a 24% Dairy Balancer when feeding a higher proportion of grass silage to maize silage or beet (65:35)
- Includes a blend of protein sources including soya bean meal, maize distillers and rolled beans
- Includes soya hulls as the source of digestible fibre
- Recommended feeding rate of up to 8Kg per head per day
- Includes a high phosphorus dairy mineral
- Includes .

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
14%	10.8	0.90	✓		✓	

## SUPREME DRY COW

- Includes a blend of cereals including oats which are excellent source of oil and fibre
  - Includes a high specification pre-calver mineral
  - Recommended feeding rate of 2 kg per head per day for 2 – 3 weeks prior to calving
- This formulation aims to prepare the cow for lactation by building body reserves of essential trace elements and helps prevent calving difficulties, retained after-birth, uterine infections and lactation metabolic diseases.

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
18%	11	0.93	✓		✓	

## SUPREME HEIFER REARER

- High quality formulation with a blend of cereals including barley and maize
- Includes soya bean meal to promote strong growth rates and develop a strong animal frame
- Recommend to feed Supreme Heifer Rearer to replacement heifer calves from 6 months of age
- Recommended feeding rate is 2kg per head per day but this should be varied depending on whether or not the animal is on target, forage quality and quantity
- Extra Phosphorus added to help bone development
- Includes .

Crude Protein	ME	UFL	Bulk Coarse	Bags Coarse	Bulk Pellets	Bags Pellets
20%	11	0.94	✓	✓	✓	✓

Note: Proteins and energy levels can vary slightly from the listed with changes in ingredients used

Our Agri Technical Sales Advisors provide year-round advice to our farming customers. Whether you are involved in dairy, stock, tillage or mixed farming, Quinns aim is to make you a more profitable farmer by giving you the best advice, product and value available.
